

Brock Motorsport 2008 / 09 Season

Brock's Precision Dodge Suzuki in the lead bunch of Class C.

The Suzuki field put on some incredibly close racing this weekend on the very tight and technical Ruapuna Raceway and Brock was right in the thick of it all. As Brock stated after the weekend the competition in this class is incredibly tough and close with 6 or 7 fighting for the lead at all times. This tight racing between the one make class of Suzuki Swifts put on a great spectacle for the crowd of Motorsport enthusiasts over a gloriously sunny Canterbury weekend. Positions changed every lap and in every one of the 3 races with the margin of difference in the tenths of seconds between the top 6 or 7 cars and this series is by no means won or lost at this point in time.

However as with any racing this close some drivers felt the need to push the limits past their own abilities and again as at Pukekohe, although not as severe, several Suzuki's sustained panel damage and will require some repairs before the next round at Timaru.

Brock was happy with the car speed at this round and was very grateful for all the work the team had done in the time after the Pukekohe round to sort out a technical problem which restricted the engine power.

He was happy to move up a place overall after this round and now lies in 5th position overall with 4 more rounds to compete

The Suzuki New Zealand Production Racing Series now takes a brief break for Christmas before racing commences again at Levels Raceway in Timaru on January 09-11, as part of the South Island double that sees Teretonga Park follow a week after on January 16-18, 2009

Brock's Precision Dodge Suzuki is proudly supported by major sponsor Century Yuasa along with last years sponsors Dodson Japanese Autospares, Warren Fowler Hard Rock Quarries, Tyler Davies Group, Autocolour European and Legend Graphics, Top 10 Holiday Parks for assisting with accommodation, and thanks to Team Andy Knight for providing storage for the Suzuki between meetings.
